IMPRESSIVE Line 70 P

CLASSIC DESIGN AND PROVEN SOLUTIONS
TAILORED TO YOUR NEEDS

IMPRESSIVE Line 73 P series is being fabricated from Perfectline profiles of VEKA manufacturer.

Due to simplicity of their design, the profiles provide a classic look, which will fit perfectly to the minimalistic style of one's home. Closed steel reinforcements in combination with A class profile improve the statics of a window and influence its sustainability.

IMPRESSIVE windows are dedicated in particular to private housing estates. Great availability of panes, difference in profile designs and wide range of veneers provide unlimited configuration possibilities. Deciding on IMPRESSIVE product series, one chooses windows tailored to individual home design.

*** Glass Package**

Standard 2-glass package of $U_g = 1,1$
There is a possibility to use various energy-saving, anti-bulglar and sound absorption glass units 24-42mm deep.

Warm spacer

There is an optional possibility to use warm glass polymer spacers in 6 colours.
They improve thermal and easthetic qualities of a window.

Glazing beads

There is a possibility to choose square or rounded beads.

Hardware

Renowned Roto NT hardware makes it possible to use different functional solutions such as anti-bulglar protection, opening sensors, arrestable brake-stay (handle operation), multi-level arrestable ventilation-stay or Tilt First solution designed especially for the youngest group of users.

Profile system

5-chamber system of 70mm construction depth, class A, provides heat protection on high level.

Aesthetics

Modern design will fit perfectly to the minimalistic style of one's home

External sides

Thickness of the external sides of profile according to the highest RAL standards- "A Class" (PN-EN 12608).

Gaskets

High quality EPDM gaskets provide excellent impermeability, acoustic and thermal insulation as well as high resistance to UV radiation. The angle of surface elements of the gaskets are identical as the profile's, 15 degrees, which enables excellent drainage of dirt and water.

Steel reinforcements

Closed steel reinforcements in frame and bent in sash improve windows statics significantly influencing their safety and sustainability of a construction.
